

FlashStart®
INTERNET PROTECTION

The ultimate **filtering** experience
for **ISP & WISP**

Modern and **simple interface** for desktop, tablet or mobile.

**Declare ISP
public networks
one time**

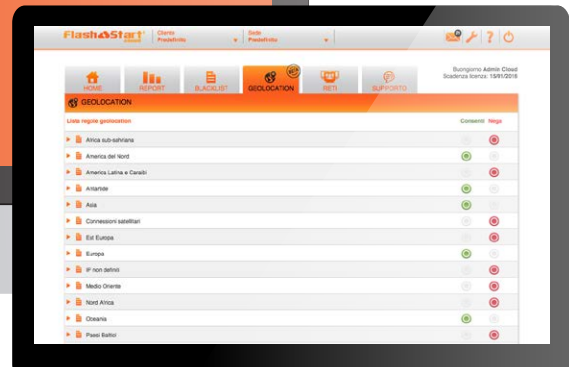

**Configure
3 profiles**

**Point to the
DNS associated
with the profile**

**ISP Lite Filtering
for SOHO
and Residential**

FlashStart **Lite** VS FlashStart **Standard**

FlashStart offer **two ISP/WISP models** to fit every customer need:

FlashStart **Lite**

Suitable for **SOHO** and **Residential**, offers **content** and **malware filter** without any need for registration and configuration. The ISP/WISP IP network address ranges need be declared one time only.

Every customer can then choose between **three policy profiles**, globally configured.

Can be deployed with full public IP networks or mixed public and private IP networks

FlashStart **Standard**

Suitable for **any subscriber** requiring policy customization, reporting and geolocation assessment.

Initial configuration but wizard on the Client's router.

It is suitable both for fixed and dynamic IP address and requires a public IP address.

FlashStart standard **allows end-user to modify Flashstart policies** on a multi-tenant server environment.

Features	FlashStart Lite	FlashStart Standard
