

**FlashStart®**  
INTERNET PROTECTION

Version  
**ISP & WISP**

[flashstart.com](http://flashstart.com)

# The **solutions** for **ISPs, WISPs & Telcos**

---

## For the **Operators**

**Security, productivity** and **compliance** with current guidelines travel hand in hand with the broadband Internet. With FlashStart's protection, the **online approach is safe, reliable** and **secure**. Operators can choose between two distinct solutions to filter and protect their Customers.

---

## FlashStart **Lite**

Customized for **small Operators** operating primarily with **residential and SOHO customers**, it offers **Parental Control** and **Malware Protection** in the Cloud at a highly competitive price with continuously updated blacklists.

---

## FlashStart **Premium**

Dedicated to **larger Operators**, it includes high-level features and components such as **on-premises DNS Cache, Data Export** to export and analyze DNS traffic, import of personal **RPZ Blacklists** to add additional lists and anti-piracy blocking, **App Blocker** and **IP Blocking** to prevent access to sites residing on compromised servers. Along with excellent **premium support**.

---

## An excellent **Global Service**

FlashStart Lite and Premium is dedicated to Operators of any size and type. It **improves traffic health** and **quality** with an advanced AI-based DNS filtering system that meets the Legal Directives.  
In addition, FlashStart **protects Operators' public IPs** by keeping them safe from global blacklists and protects networks from malware, botnets and phishing, reducing customers' technical support costs.
