flashstart.com

The FlashStart **Platform**

Protection against cyber threats

Innovative, cloud-based filter for malware, ransomware, botnets, phishing and dangerous contents. More than ninety blacklist categories, constantly updated by AI, with completely customizable protection.

Multi-tenant with detailed reports

Dashboard configurable with isolated customers and tenants, and detailed reports with a variety of views: by category, profile, user, traffic router, etc., in compliance with international privacy regulations.

Integration with MS-Active Directory

Native support for synchronization of the MS-Active Directory. It allows for the application of specific policies for groups, users, and workstations.

Immediate protection anywhere

Global protection on an ultrafast Anycast network, with both LAN and roaming endpoint protection (ex. for smart-working and distance learning).

The easiest installation

Excellent compatibility with any type of router, WiFi hotspot, firewall, gateway. Support for both static and dynamic IP, IPv4, IPv6. Native APP for Windows, Android, Chromebook, and iOS.

Outstanding human support

Highly qualified engineers available to quickly resolve any problem at any time, in English, Spanish, or Italian. Extensive supply of guides, tutorials, and recurring instructional events.
