Cloud Filtering for
Manufacturers
OEM

flashstart.com

Our **solution** for **OEMs**

Info

FlashStart is the ideal partner for any Original Equipment Manufacturer looking to integrate cloud-based protection capabilities.

Deep libraries and APIs constantly updated by our development department create optimal synergies between our filter and OEM ecosystems. FlashStart allows rebranding with the partner logo and sells only through authorized resellers.

Total protection

Our differentiated pricing by user type provides OEMs with margins significantly above the market. Our platform operates on extremely stable global Anycast Network and among the fastest in the world according to Dnsperf.com surveys

Protection everywhere

FlashStart's Artificial Intelligence updates 85 blacklist categories, offering the maximum possibility of filter customization. Protection can be total by activating blocking browsing to high-risk countries.

Why choose FlashStart?

Effective cloud protection
AI-backed DNS security against malware, botnets, phishing, and all kinds of hacker attacks. Highly customizable unwanted content monitoring.

Advantageous distribution
Multilevel distribution favored by rebranding with OEM logo. Indirect sales, only through partners, with margins significantly higher than the market.

Facilitated licensing
Final price differentiation based on user type. Easy license tracking and centralized control via multi-tenant Dashboard.

API and advanced integrations
Support for any router and device. Always up-to-date APIs to interface with OEM products and services. No upgrade requirements.

Security everywhere
Stable protection at any location, with undetectable latency thanks to Anycast network among the fastest in the world. Unique ability to monitor on a geographic basis.

Customized support
Effective multilingual technical support , including chat. Flexibility of the development department to optimize synergies and possible requests.

Functions / Technical features

Malware Protection
Navigation security from malware,
ransomware, botnet, phishing...

IP protection from blacklists
Upkeep of public IPs out of global blacklists.

DNS Intelligence on contents
