flashstart.com

Main technical features

Parental Control and malware protection.
FlashStart conforms to law directives, assisting the ISP Operators with their legislation abidance, improving at the same time the security from malware, ransomware, botnet, phishing and band fluidity.

App Blocker and IP Block
For blocking the access to sites that are based on compromised servers as well as the APP's that are considered most dangerous.

IP Protection based upon AI.
Maintenance of Public IP's with over 200 categories on the blacklist with continual updates through artificial intelligence.

Geoblocking
For blocking the navigation towards Countries that are considered to be risky for hackers and cyber threats.

Amongst the Top 3 worldwide.
Independent benchmark certificate from Dnsperf as one of the top 3 fastest DNS Resolvers in the world.

Data exportation
That allows you to export data to be used with a successive analysis or even to import or export for DNS traffic analysis.

Local DNS Cache.
Optional DNS proxy that can be inserted onto the ISP network for ulterior resolution latency.

Maximum compatibility
Connection with any router, WiFi hotspot, firewall and gateway. Dynamic and Static IP support (IPv4, IPv6).

RPZ customable Blacklist.
Importation of RPZ personalized blacklists for adding extra lists for anti-pirating.

Excellent technical support.
Multilingual 24/7 assistance from our highly qualified engineers.
