How was the relationship between FlashStart and Telefónica Global Solutions established?

In order to show TGS that Flashstart could meet the needs of its customers. For which a proof of concept was made where the functionalities requested by TGS were shown.

Why choose FlashStart

One of our major global customers needed to find a solution that can provide them with a fast, scalable, reliable and secure name resolution (DNS) solution.

They also needed visibility or KPIs for their customer's internet service. Flashstart fulfilled everything they needed, as well as cost benefit well above other solutions on the market. This allowed the client to optimize up to 20% of their investments with better services.

What was the decisive role or event that brought FlashStart to Telefónica?

Cost benefit, all that Flashstart could offer TGS for its internet services.

Feedback on your relationship with FlashStart

It is a very advantageous relationship for Noovus and our customers. It allows us to offer a valuable solution to ISPs to improve internet service (speed, security, availability and KPIs).

Noovus Technology

The company

Noovus is a provider of information technology (IT) and operation (TO) solutions and integration, founded in Peru in early 2018 by a group of experienced professionals. These teams have experience, communications, data center, cybersecurity in Peru and international markets.

Since founding, they have worked with the best brands in the industry to digitally transform client organizations and ensure they get the most out of their technology investments. Engineers and architects design, build, deliver and manage solutions and services for clients of all sizes in diverse industries.

In 2022, Noovus' operation begins in the U.S. in order to serve companies that require Noovus' presence in even more countries.
